

Titan Module: **Connect**

End-User Access via Mobile Apps and Secure Interfaces

Titan Connect bridges the gap between citizens and their data. It provides a unified platform for secure, real-time access to personal health records across disparate systems.

Key Capabilities:

Native iOS and Android apps for on-the-go access.

Secure kiosk deployment in clinics, pharmacies, and public spaces

View, grant, or revoke access to health data in real-time

Aggregate records from multiple systems into a single, user-controlled interface

Use Cases:

Citizen-facing public health systems

Patient engagement and telehealth services

Cross-institutional data aggregation and control
