

Quantum Transformation for the World

100% Modular, Mobile, Private Informatics platform designed for modern needs.

- A paper to digital Informatics system, for any data source.
- Strong AI driven OCR that matches forms to database fields.
- A quantum (FAST) application that democratizes data to all constituents.
- A secure platform that ties data systems via blockchain or any other cryptography.
- Unheard of Analytics capability to find trends, causes and other concerns
- Native video capability for Telemedicine and other humanistic measures.

NO OTHER SOLUTION DOES THIS!

TITAN
BY CCG

Titan Module: Discover

The ability to digitize paper records at scale dynamically leveraging Quantum computing technologies to support applications with sub ms speed.

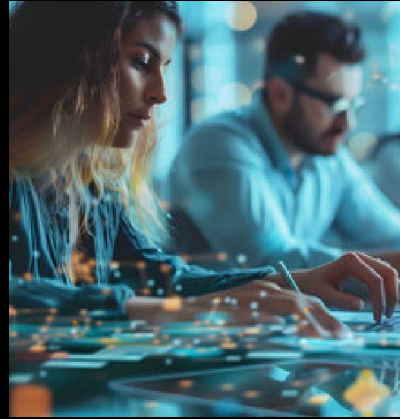

People

Fractional GTM

- CRO/VP
- Sales Engineering
- Corporate Development
- Marketing/Graphic Design
- Customer Success Group

Security Professionals

- Virtual CISO
- Security Architects
- Application Security Readiness

Full Service

- Technical
- Sales
- Leadership

CCG Service Offerings

Process

- Market Evaluation
- Product Market Fit
- Development Partners
- Playbooks and Campaigns
- Customer Support and Retention
- Procurement and Sourcing Optimization

Security Offerings

- Information Security Management Systems
- Security Audit Readiness
 - Customer: 3rd party risk
 - GRC like PCI, NIST
- Application Security
- Security Operations Center Optimization
- InfoSec Automation

About the Founders:

CyberSecurity, AI, and Quantum Experts

60+ Combined years of experience

13 companies/products developed

9 successful exits
