

Titan Module: Protect

Data Protection for Modern Threats

Titan Protect provides real-time, AI-powered defense mechanisms to secure sensitive datasets from unauthorized access, ransomware, and evolving cyber threats.

Key Capabilities:

- AI-powered anti-ransomware protection
- Real-time monitoring of data access patterns
- Automatically blocks unauthorized or suspicious access attempts.
- Supports HIPAA, GDPR, and other regulatory data protection requirements.

Use Cases:

- Critical infrastructure protection
- Secure healthcare, finance, and public-sector operations
- Zero-trust environments for data sharing
